ABOUT US

Mr. Lemonade is a family business. We value craftsmanship, people, quality and sustainability.

We love good food, but many times the problem was what to add to our meals, instead of alcohol or full of calories and sugary drinks.

Then we decided to check other options, and we realized there are a lot of good products made by small, family companies similar to us, but the problem was availability.

Since then, we supply cafes, restaurants, and shops with the best we could find for them.

Why?

We want to help new, small yet innovative companies, who find it difficult to sell their amazing and unique products and connect them with health-oriented people, who want not only good food but also a great drink to go with it.
